SIR: Since our last advices of 12th
our Cotton Market has been steadie
a better demand from the trade, and
of Americans have been well supp
with perhaps a slight improvement
lower qualities. At the last Manc
Market, there was a fair amount of bu
done on previous terms—the recent f
having proved to be not so extensive
at first supposed. With the usual d
for goods from the United States,
would no doubt advance; but as it is,
ufacturers are obliged to meet the tr
order to prevent an accumulation of
and the spinners continued working
time.

It is now thought there will be no r
between this country and France;
the recent acts of the French Gover
ordering the fortification of Paris and
of the sea-ports, together with the gr
crease in the Army and Navy, are sym
of any thing but a peaceful disposition,
a rumor is abroad that equipments have
sent to the Syrian coast. It would
therefore, there is still some uncer
about the matter.

The harvest in this country may n

Scotland and Ireland, there is still a
deal unhoused, and the weather of la
been any thing but favorable. The d
Wheat, after being one week at 2s. 8
quarter, is now 10s. 8d. There was a
quantity released from bond at the f
duty.

With respect to future prospects, w
only say, that should no hostilities
with France, we may expect a gradua
provement in general business. As to
ton, a great deal will depend on the e
of your growing crop—the general op
being at present that it will fall but
short of that of last year. The sales o
week sum up 22,900 bales, mostly t
trade. The stock is 500,900 against 45
same time last year.

In Tobacco, not much is doing, bu
of the late arrivals having been hit
sampled. Prices, however, are firm,
a good feeling. We remain, &c.,

HAVRE, Sept.

COTTON.—Within these few days the
ation of political affairs has become
gloomy than previously, and the ea
question, which has so long absorbed
public attention, has began to assume a
more complicated character. The un

dominates over every other feeling,
consequently, all idea of war is repudi
but the extensive preparations on all s
which have already produced a heavy de
ciation in the public securities, are neve
less calculated to create a considerable
gree of anxiety as to the ultimate res
the pending events. The recent intellig
from Egypt, the seat and main cause of
existing difference, coupled with the
sures now in progress by our governmen
order to meet every emergency, have th
fore given rise to the almost complete
nation in Cotton transactions during the
week, the demand being in some insta
merely confined to purchases for tra
owing to the low scale of our prices as
pared with those in Liverpool. But,
withstanding the scanty attendance of
