NOTES.

One of the branches of the Exchange and Banking Company is to be at Plaquemine, and another at Natchitoches; the intended location of the third branch is unknown, as is also the location of the branches of the New Orleans Gas-light and Banking Company, and of the Atchafalaya Rail-road and Banking Company. For the location of the branches of the other banks, see S No. 1.

It has been observed, that, inasmuch as many of the branches of the banks of Louisiana act, to a certain extent, as independent banks, Table I. does not show the whole extent of their operations. In the statements rendered, the banks make their branches debtor for the amount of capital furnished them and on running account, and credit them on running account.

According to the returns made to the Treasury Department, the amount of capital paid in, of the branches believed to be actually in operation, is $5,100,000. Supposing the liabilities and resources of the branches to be in about the same ratio to their capital as those of the parent banks are to theirs, the principal items would stand as follows:

Loans and discount	$8,007,318
Bonds and mortgages	924,508
Suspended debt	49,187
Stocks	141,808
Real estate	634,386

NOTES.

Due to parent banks	$663,396
Other liabilities	709,920
Capital	5,100,000

This estimate is given as the best which circumstances will permit to offer. An article which has appeared in the public prints, and which is believed to be from a gentleman well acquainted with banking affairs in that quarter of the country, intimates that the parent banks in some of the southwestern States are very imperfectly acquainted with the condition of their branches.

If the estimate here offered be regarded as admissible, the total extent of banking operations in Louisiana is about as follows, *exclusive* of the operations of the agency of the United States Bank, some account of which will be found in S No. 2.

Number of banks in operation in Louisiana in October, 1836	14
