From the imperfect manner in which the books and papers of the bank had been kept, and the fact that little confidence could be placed in the entries there made, it was found difficult to ascertain the actual amount of the assets and liabilities of the institution. The books exhibited, at the time last mentioned, the circulation of the bank at \$22,642. The amount *actually* in circulation, however, must have been about \$42,363. Discounted paper in bank amounts to about the same sum as the circulation. There had also been violations of the provisions of law in other particulars not above mentioned.

Securities by bonds, and mortgages on real estate, were given to an amount to insure, it is confidently believed, the final discharge of all liabilities.
