CRA Basics
Objectives

Upon completion of this session you should be more familiar with:

- The purpose of the CRA
- Terms and definitions under the CRA regulation
- Technical requirements of the regulation
Purpose of CRA

Encourage banks and thrifts to help meet the credit needs of their *entire* communities, in particular, historically underserved people and places

- Low- and moderate-income people
- Low- and moderate-income geographies
- Certain non-metropolitan middle-income *geographies*, or designated *disaster areas*
- Must be consistent with prudent, safe, and sound business operations
CRA Statute

- Enacted to prevent redlining and to encourage financial institutions to help meet the credit needs of all segments of their communities, including low- and moderate-income (LMI) neighborhoods.
What is CRA?

The CRA requires regulators of insured depository institutions to assess the record of each bank and thrift in helping to fulfill their obligations to the community and to consider that record in evaluating applications for charters or for the approval of bank mergers, acquisitions, and branch openings.

- An affirmative obligation
- Enforced under implementing regulations
- Enforcement primarily through application process - CRA contains no civil or criminal liability provisions
What is CRA? (continued)

- CRA applies to federally insured depository institutions: national banks, thrifts, and state-chartered commercial and savings banks.
- The federal and state financial institution regulators are:
  - Board of Governors of the Federal Reserve System (FRB)
  - Office of the Comptroller of the Currency (OCC)
  - Federal Deposit Insurance Corporation (FDIC)
What is CRA? (continued)

Banks are evaluated based on asset size using specific criteria for:

- Small Banks (assets under $1.284 billion as of December 31 of either of the two prior calendar years)*
- Intermediate Small Banks (ISBs) (assets of at least $321 million as of December 31 of both of the two prior calendar years, and less than $1.284 billion as of December 31 of either of the two prior calendar years)*
- Large Banks (assets of at least $1.284 billion)*
- Wholesale & limited purpose banks
- Banks with approved CRA strategic plans

*As of 1/1/2019. These thresholds are updated annually.
Regulators mandate that banks can meet CRA responsibilities with safe and sound loans, investments, and services.

Regulators anticipate/expect that banks can find CRA eligible projects in their community.

Banks are permitted to develop and apply flexible underwriting standards for loans that benefit low- or moderate-income geographies or individuals, only if consistent with safe and sound operations.
Definitions

- Census Tract
- Geography
- Area Median Family Income (AMI)
- Low- and Moderate-Income (LMI)
- Assessment Area (AA) delineation
Census Tract

- Census tracts are small, relatively permanent statistical subdivisions of a county
- Uniquely numbered in each county with a numeric code
- Census tracts average about 4,000 inhabitants
- Minimum Population – 1,200
- Maximum Population – 8,000
This map shows the state of Alabama, with each of its counties outlined in black. The multicolored areas within the county boundaries indicate the census tracts located inside that county.
This map shows a census tract in Alabama as its boundaries appeared in 1970. Population growth over the next 40 years led to its division into multiple tracts.
By 1980, the original census tract experienced sufficient growth to split into two tracts.
By 1990, the two tracts grew sufficiently in population to trigger a split into four tracts.
By 2000, population grew so significantly, the tract was further divided into 12 tracts. All are located within the same piece of land as the original 1970 tract.
Geography

- **Geography**: a census tract delineated by the United States Census Bureau in the most recent decennial census

- **MSA**: metropolitan statistical area as defined by the Office of Management and Budget (OMB)

- **Nonmetropolitan areas**: areas not located in an MSA
Area Median Family Income (AMI)

- An annual income figure for which there are as many families with incomes below that level as there are above that level.

- The median family income for an MSA, if a person or geography is located in an MSA.

- The statewide nonmetropolitan median family income, if a person or geography is located outside an MSA.
Area Median Family Income (AMI) (continued)

Area Median Family Income (AMI) is used to:

- Evaluate if an MSA or non-MSA geography is considered low-/moderate-/middle-/upper-income (American Community Survey-ACS)
- Evaluate if borrowers in an MSA or non-MSA are considered low-/moderate-/middle-/upper-income (Federal Financial Institutions Examination Council-FFIEC)
Low- and Moderate-Income (LMI)

- **Low-income** = a geography (census tract) or borrower whose income is less than 50% of the AMI;
- **Moderate-income** = a census tract or borrower whose income is at least 50%, but less than 80%, of the AMI;
- **Middle-income** = a census tract or borrower whose income is at least 80%, but less than 120%, of AMI;
- **Upper-income** = a census tract or borrower whose income is equal to, or 120% of, AMI.
MN: MSA & Non-MSA Comparison

Hennepin County: MSA
$82,300 (AMI)**
- Low <$41,150
- Moderate $41,150-<$65,840
- Middle $65,840-<$98,760
- Upper= or >$98,760

Beltrami County: Non-MSA
$61,700 (AMI)
- Low <$30,850
- Moderate $30,850-<$49,360
- Middle $49,360-<$74,040
- Upper= or >$74,040

**2013 FFIEC Census Report
Middle-Income Geographies

Distressed

- Unemployment at least 1.5 times the national average
- Poverty rate of 20% or more
- Population loss of 10% or more between the previous and most recent decennial census, or
- A net migration loss of 5% or more over the 5-year period preceding the most recent census
Middle-Income Geographies

Underserved

- Must meet population size, density, and dispersion requirements
- Distant from a population center
- Likely to have difficulty in financing the costs of essential community needs
Assessment Area (AA) Delineation

Banks are required to delineate their assessment areas based on the following:

- Must include geographies where an institution has its main office and its branches that take deposits, or has deposit-taking ATMs…
- As well as surrounding areas in which it has originated or purchased a substantial portion of its loans
- Must consist generally of one or more MSAs, or one or more contiguous political subdivisions such as counties, cities, or towns
Assessment Area Delineation (continued)

Limitations on Delineation:

- Must include only whole geographies
- Must not reflect illegal discrimination
- May not arbitrarily exclude LMI geographies
- Generally, may not extend substantially beyond an MSA or state boundary
