Overview

- How measures can drive a national movement to improve health
- Share RWJF vision and collaborative action framework
- Establishing a research and evidence base
- Share some candidate measures
- Looking ahead for partnership opportunities
What is the new RWJF strategy and how this might resonate with your work?

RWJF’s vision seeks to build a national movement to create a Culture of Health that enables all members of our diverse society to lead healthier lives, now and for generations to come.

- Multiple sectors work together to make health and well-being a national priority
- Individuals are interested in making healthy choices IF
- National focus shifts to greater equity in social, environmental and economic determinants of health
RWJF’s Strategic Approach

Operationalize the Culture of Health (CoH) Vision:

- Develop national framework to describe core components;
- Describe how this action framework will be applied and measured; and
- Augment with local measures and strategic communications to catalyze a national movement.
- Use measures to align Foundation grant making
- 20 year strategy
What is a Culture of Health? Moving from Vision to Measures.

A Culture of Health exists when expectations about the high value of health are shared across sectors, and when individuals and organizations have the capacity to:

- Promote individual and community well-being (as defined by physical, social, and mental health);

- Create physical, economic and social environments that prioritize health; and

- Support access to opportunities for healthy living and high-quality health care for everyone.
Ten Principles of a Culture of Health

- Opportunity to be healthy and stay healthy is valued
- Individuals and families have opportunities for health and well-being
- Population health guides decision making
- All sectors are working together
- We’re all in this together
- Health care is efficient and equitable
- Optimal health and well-being
- No one is excluded
- Everyone has access to affordable, high-quality health care
- Economy is less burdened
Building on some existing data and sources
Our Research and Evidence Process

- Research partnership with RAND and other organizations
- Developing evidence base through focus groups and 13 community assessments across the nation
- Extensive outreach with stakeholders at multiple levels
Drivers, determinants, and root causes

Multiple levels

Modifiable

Entire lifespan

Nontraditional, innovative perspectives

Evolve over time

Measures to Drive a Change Process

How?
- Catalyze dialogue through extensive communication platforms
- Recognize and spread innovations that will improve outcomes
- Deep community engagement

Goals:
- Change default language of health as illness care
- Increase understanding of social determinates
- Mobilize action at multiple levels
- Change how decisions are made
- Broaden accountability
Fostering Collaboration to Build Health Partnerships

Valuing Health and Social Ties

Improving Equity in Healthy Community Environments

Re-Envisioning Health and Health care

Improved Population Health Systems and Well Being

Action Dimensions

Outcomes
Valuing Health & Social Ties: Subdimensions and Sample Measures

**Attitudes and expectations:**
- Percent of population searching for preventive information in web-based searches
- American health values segmentation analysis regarding personal health behaviors or priorities
- Percent of population who believe their health is interdependent with others in their community

**Sense of community:**
- Percent of population who can rely on neighbors, or report adequate social support

**Civic engagement:**
- Percent of population voting in general election
Fostering Collaboration to Build Health Partnerships: Subdimensions and Sample Measures

Enumeration of high quality partnerships

- Percent of local health departments that collaborate with community organizations in at least four areas

- Percent of local health departments that have implemented community health improvement plans through community partnerships

- Percent of hospitals collaborating with community partners on action to achieve a Culture of Health
Improving Equity in Healthy Community Environments: Subdimensions and Sample Measures

Physical environment:
- Percent of households living in ‘unhealthy housing’
- Ratio of food retailers with less healthy options to those with healthier options

Social and economic conditions:
- Proportion of three-five year olds with access to preschool or certified preschool programs
- Prevalence of full-day kindergarten by state
- Percentage of children whose parents lack secure employment

Policy, government, and governance:
- Prevalence of clean indoor air laws
Re-Envisioning Health and Health Care: Subdimensions and Sample Measures

Access:
- Percent of population with stable health insurance
- Percent of population served by an accredited public health department
- Percent of unmet mental health need among those diagnosed

Consumer experience:
- CAHPS summary measure

Balance and integration:
- Proportion of health care systems completing community action plan
Wellbeing:
- Percent of population rating health as good or excellent
- Average score on livability index among seniors
- Percentage of violent crimes

Chronic disease and adverse life experiences:
- Rate of disability-adjusted life years

Health costs:
- Percentage of social service vs. health care spending
- Average health care expenditure per family/household
Creating a culture of health means examining the social, environmental, and economic factors involved in getting and staying healthy.

Source: A Hundred Years
Sentinel Communities

- **Purpose:**
  - Deep-dive on culture change

- **Selection:**
  - 20 – 25 communities
  - Maximize variation on variety of factors

- **Activities:**
  - Local data collection and policy reviews
  - Surveys
Looking Ahead for Partnership Opportunities

- Continuing research, stakeholder development, and metrics development
- High interest in linking community development and COH (Our continuing work with the Federal Reserve a great example)
- Building the Website including links to local data, stories, action strategies and toolkits
- New RWJF programs to support these COH

Timeline: Spring 2015: Culture of Health.org website and measures launch
