

# Non-parametric estimation of the Phillips Curve: A switching regime consistent with segregated job networks

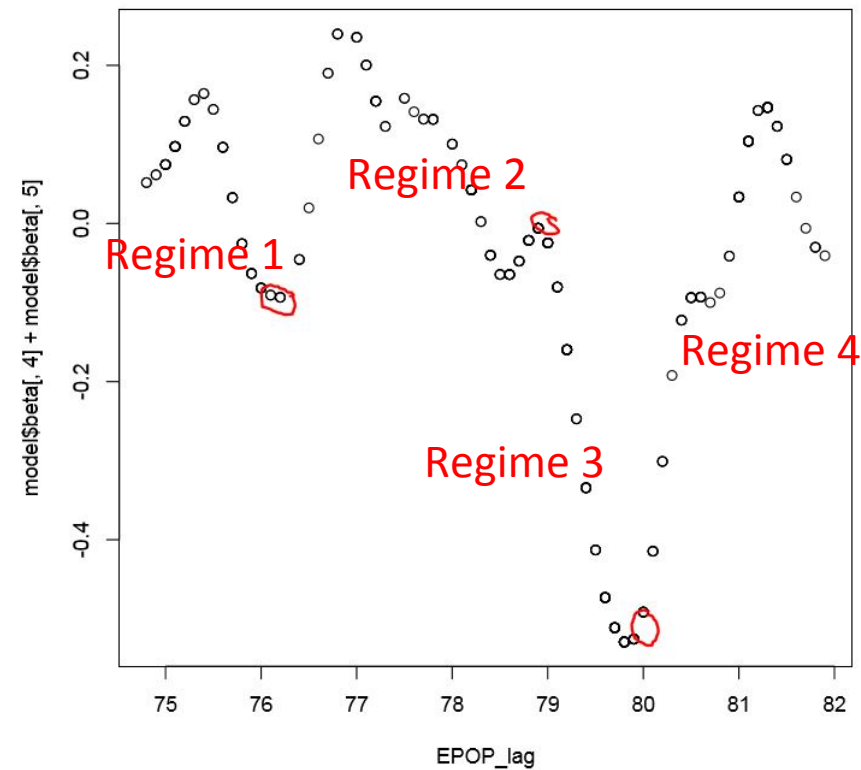

**Deniz Baglan**

Howard University

**William E. Spriggs**

Howard University and AFL-CIO

Allowing for the coefficient between Adult Black unemployment rate and wage inflation to vary for each level of prime age adult EPOP: in regime 3, the typical negative relationship emerges

The current prime age EPOP puts us in regime 3, where much room remains for lowering unemployment
